On-Prem baseline includes DB + Forms infrastructure + all Oracle license support (DB $700K + WLS $176K + HW + labor). ODB@Azure options use BYOL (reuse existing licenses). Azure PG + Modern App eliminates ALL Oracle licenses and requires full DB re-platform + Forms rewrite — highest Year 1 but lowest Years 2–3. Break-even vs on-prem: ~Month 10 (Exascale), ~Month 28 (PG modernize). Support Rewards: 25% of ODB ECPU spend credited vs Oracle DB support fees.
